Professional Summary

Computer Science undergraduate focused on full-stack web development and applied AI. Built and deployed several end-to-end projects using React, Next.js and Node.js, including tools that integrate LLM APIs for practical tasks such as automated calorie tracking and document summarization. Comfortable working across the stack, from REST API design and database modeling to responsive UI development, with a solid grounding in Data Structures & Algorithms.

Education

VIT-AP University, Amaravati, Andhra Pradesh *Expected 06/2027*
Bachelor of Technology, Computer Science and Engineering | CGPA: 8.08/10

Sri Narayana Junior College, Guntur, Andhra Pradesh *05/2023*
Intermediate (MPC) | Percentage: 95.4%

Unique Concept School, Sattenpalle, Andhra Pradesh *03/2021*
Secondary School (SSC) | Percentage: 98.6%

Skills

- **Languages:** Java, Python, JavaScript, SQL
- **Web & Frameworks:** React.js, Next.js, Node.js, REST API Design, HTML/CSS
- **Databases:** MongoDB, PostgreSQL, SQL
- **AI/ML:** LLM Integration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Gemini API
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (Java), DBMS
- **Tools & Platforms:** Git/GitHub, Docker, AWS (Free Tier), Vercel, Linux, Figma, Canva, VS Code, Google Colab

Projects

Vathavaran - Meteorological Intelligence Platform
React JS,TypeScript,Vite,Python,FastAPI, Scikit-Learn,Open-Meteo API | Web Link: https://vathavaran-five.vercel.app/

- Delivers live temperature, UV index, wind, and pressure stats alongside 24-hour timelines and 7-day predictive outlooks.
- Features an AI model that forecasts rain arrival windows, comfort ratings, and outdoor travel advisories.
- Includes an interactive map with auto-GPS detection, global search, and saved search history for easy access.

Summariz - ClientSide AI Document Summarizer
React 18, TypeScript, Vite, Gemini API, Tesseract.js | Web Link: https://summariz-manijoshi-567.vercel.app/

- Engineered a 100% client-side, privacy-compliant document summarizer with zero server-side data retention.
- Built local parsing pipelines using pdfjs-dist, Mammoth.js and SheetJS, paired with Tesseract.js (WebAssembly) for OCR on scanned images and invoices.
- Optimized LLM inference with structured JSON-schema outputs to generate Short/Medium/Long summaries in a single API call, cutting token usage and latency by 60%+.

Personal Portfolio Website
Next.js, React 19, Tailwind CSS, Motion | Live Demo: myportfolio-vijaykumar.vercel.app

- Designed and built a responsive personal portfolio with dark/light mode, smooth scroll reveals, and spring animations.
- Implemented interactive modals for Projects, Certifications and Education, with a mobile-responsive slide-out menu.
- Integrated the Web3Forms API for a fully functional contact form with real-time success/error feedback.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional - Oracle
- AWS Academy Graduate - Cloud Architecting - Amazon Web Services Training and Certification
- Image Processing Onramp - MathWorks(MATLAB Academy)
